

Feb. 3, 2022

Dear Neighbor,

We are sending this letter as a courtesy to share information about pipeline commissioning work in your area.

As you are aware, the final section of our 20-inch Mariner East pipeline has been installed in Chester County. We are pleased to be preparing to place this section into service.

As we complete final preparation and maintenance work, you may have begun to notice noise and increased activity at the South Pennell Valve Site, located near Lenni Road. Crews will be utilizing flares at the valve station intermittently for several weeks, at which time you may see visible flames and truck traffic at the valve station. Please note that this is routine maintenance and preparation work. We have made contact with County 911 and local officials to advise that any noticeable activity is being managed by trained and qualified personnel under controlled conditions. This work is anticipated to be completed by early to mid-March.

If you are an online landowner and have any questions about this activity, please contact your designated right-of-way agent. If your property is not directly involved in construction (off of the right-of-way), please contact our community hotline: **(855) 430-4491**.

Thank you for your continued patience as we take the final steps to complete this energy infrastructure project.

Sincerely,

A handwritten signature in blue ink that reads 'Joseph Massaro'.
