**RE: SCHEDULE OF WORK UPDATES FROM ETP/Sunoco February 28, 2022**

**Construction:**

- Continue final tie ins at Glen Riddle Station
- Leak test at Glen Riddle Station
  - o On Monday, Feb. 28, crews will be performing a 4 hour leak test on the tie in section of pipe. There will be noise for a short duration when the pipe segment is dewatered. Due to the small size of pipe being tested, noise will not be long in duration.

**Operations:**

- 2/28 – We will have a crew at South Pennell Valve station monitoring the site while nitrogen is swept through the line. This is done to make sure there are no more hydrocarbons in the pipeline. This should be completed in one day. Nitrogen is being pumped from another valve site so there will be minimal activity at South Pennell.

If you have any questions or concerns, please contact the ETP/Sunoco community hotline at 1-855-430-4491.

Sincerely,

  
John McMullan  
Township Manager
