

Re: Overburden Storage Area

**Heidelberg Materials Northeast LLC
Glen Mills Quarry
SMP No. 5273SM2
Middletown Township, Delaware County, PA**

This letter is to notify you that Heidelberg Materials has commenced the construction of an overburden storage area located along Forge Road approximately one quarter mile east of the entrance to Glen Mills Quarry. The area is within the existing Surface Mine Permit Boundary for Glen Mills Quarry. Preparation of the overburden storage area consists of the following activities:

1. Tree clearing.
2. Installation of Erosion and Sedimentation Controls.
3. Haul road construction, including installation of culverts to cross the Unnamed Tributary to Chester Creek.
4. Screening berm construction and landscaping.

The above activities have been approved and are overseen by the Pennsylvania Department of Environmental Protection, Pottsville District Mining Office (PA DEP). PA DEP's approval includes a waiver in accordance with Pa Code Title 25 §77.504 to conduct mining support activities (including screening berm construction and use, haul road construction and use, and diversion ditch construction and use) within 300 feet of occupied dwellings. Another waiver in accordance with Pa Code Title 25 §77.504 has been granted to affect areas within 100 feet of the Unnamed Tributary to Chester Creek.

It is anticipated that the construction activities will be completed by the end of June 2025. Once these activities are complete, the area will be ready for overburden storage. It is anticipated that use of the storage area will begin in Fall 2025.

Please feel free to contact me at (610) 366-4628 or katie.murray@heidelbergmaterials.com should you have any questions or require additional information. In addition to myself, questions can also be direct to PA DEP Pottsville District Mining Office at (570) 621-3118.

Sincerely,

Kathryn E. Murray, P.G.
Area Environmental Manager
