

SEPTA Track Renewal and Right-of-Way Restoration

Tuesday, July 5 – Sunday, August 21

Beginning Tuesday, July 5 through Sunday, August 21, SEPTA crews will be working along its track right-of-way between Route 1 and Sweetwater Road to restore the existing rail track and clear the right of way. Work will be performed on weekdays during daylight hours (approximately 7:00 AM to 8:00 PM). Some weekend work may be required depending on weather and project schedule.

During this period of work, crews will be working at various locations on different days along the track right-of way between Route 1 and Sweetwater Road (Glen Mills Station). The entire length of track should be considered an active construction area for the duration of work.

Work will include brush cutting and tree-pruning on SEPTA property followed by replacing rail ties and rail. Rail and non-rail vehicles will be operating on the track right-of-way, and residents and pedestrians should consider the entire length of track an active work zone and avoid trespassing on SEPTA property.

Thank you for your patience and understanding during this period of work. Please contact elwyntowawa@septa.org with any questions or if you need additional information.
